## Financial Business Plan - Rossmore and Two Riversmeet STP's

## Core Assumptions

1) Basis of costs from site specific Feasibility Report undertaken via the Football Foundation framework and specialist consultant. Capital outlay includes allowance for plan and lease restrictions fees as well as overall project contingency of £109k. Capital works will be undertaken by a Football Foundation approved contractor, using a Design 8 framework. Costs include £110k carpet replacement at Two Rivers Meet (2RM) centre. This investment is required as the existing pitch has reached life expiry. It will safegure generated from 2RM, estimated to be between £80k and £100k per annum.

2) Assumptions for additional income projections are soley focussed on new income from Rossmore site. They are cautious estimates that are based upon similar local facility DCFA, Football Foundation experience (£75k-£90kpa) and draft usage plan. The Academy will not be paying directly for use of the pitch but will ensure it is clean before it t the Leisure Centres use. The AGP will form part of the Joint Use Agreement between the Academy & BCP. Additional income generated from the Rossmore site will be rec BCP (and not form part of the overall SLM open-book based contract). No allowance is made from other potenmtial income increases (e.g. catering and increased gym mer Income assumed to increase by 2% for inflation each year only. No allowance is made within the model for income forgone during carpet replacement at 2RM, which are estimated as a second secon completed over 2 weeks over winter (when pitch hire is not at its peak), and therefore not material for financial modelling

3) Additional operational expenses including site management, insurance, general maintenance, cyclical site inspections, annual rubber crumb top-up, and utilities have been within financial modelling - with annual spend increasing by 2% inflation per annum

4) The Rossmore STP will have an estimated useful economic life of 20 years. The Football Foundation require a £25k/yr provision to be made for carpet replacements, wh anticipated every 10 years. It may be possible to extend the life of the surface beyond this depending on the type of use and maintenance programme. The fencing and LEI predicted to last 20 yrs and at the end of its useful life a new business case may be required for the replacement of these assets.

5) This project is determined to be an infrastructure / regeneration project. PWLB borrowing is therefore permissible under HM Treasury guidelines. The Council's low rate Save rate of 3% has been applied to £727k of new borrowing required, to be repaid over 20 years (the estimated useful economic life of the asset). Risk premium (the differ between low risk Invest to Save Framework rate of 3% and PWLB borrowing rate of 2.13% (as at 2 March 2021) is £77k over the borrrowing period. There is some capacity the level of additional borrowing required, in the event of costs exceeding estimates and / or external grant not being secured at levels assumed. Separate approval will be se in the event it is required. Construction works will not commence until all funding required is secured.

6) Football Foundationgrant funding of £425k - BCP and DCFA have been working together on the proposed project for 18 months. BCP is a priority area for the FF and DC FF have a good partnership relationship which has been strengthening as the project progresses. The FF framework is being followed to ensure a positive outcome at awar FF normally award at 40-50% of the build costs. FF funding will be supported by a legal funding agreement. Additionally BCP is working in partnership with the Academy to external funding opportunitiwes (e.g. Talbot Village Trust). £50k assumed for this.

7) Ownership of the asset will remain with BCP, with use by the Academy during the day, and community use at all other times. Operational running of the pitch will be delived leisure operator

8) Timeline - open for Autumn 2022
