Bournemouth, Christchurch and Poole Council (BCP) Treasury Management Strategy Statement 2023/24

Introduction

Background

1 The Authority is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low-risk counterparties or instruments commensurate with the Authority's low risk appetite, providing adequate liquidity initially before considering investment return.

2 The second main function of the treasury management service is the funding of the Authority's capital plans. These capital plans provide a guide to the borrowing need of the Authority, essentially the longer-term cash flow planning, to ensure that it can meet its capital spending obligations. This management of longer-term cash may involve arranging long or short-term loans or using longer-term cash flow surpluses. On occasion, when it is prudent and economic, any debt previously drawn may be restructured to meet risk or cost objectives.

3 The contribution the treasury management function makes to the Authority is critical, as the balance of debt and investment operations ensure liquidity or the ability to meet spending commitments as they fall due, either on day-to-day revenue or for larger capital projects. The treasury operations will see a balance of the interest costs of debt and the investment income arising from cash deposits affecting the available budget. Since cash balances generally result from reserves and balances, it is paramount to ensure adequate security of the sums invested, as a loss of principal will in effect result in a loss to the General Fund Balance.

4 CIPFA defines treasury management as:

"The management of the local authority's borrowing, investments and cash flows, including its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."

5 Whilst any commercial initiatives or loans to third parties will impact on the treasury function, these activities are generally classed as non-treasury activities, (arising usually from capital expenditure), and are separate from the day-to-day treasury management activities.

Reporting Requirements

Capital Strategy

6 The CIPFA 2021 Prudential and Treasury Management Codes require all local authorities to prepare a Capital Strategy report which will provide the following: -

- a high-level long-term overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services
- an overview of how the associated risk is managed

- the implications for future financial sustainability

7 The aim of the strategy is to ensure that all the Authority's elected members fully understand the overall long-term policy objectives and resulting Capital Strategy requirements, governance procedures and risk appetite.

8 This capital strategy is reported separately from the Treasury Management Strategy Statement; non-treasury investments will be reported through the former. This ensures the separation of the core treasury function under security, liquidity and yield principles, and the policy and commercialism investments usually driven by expenditure on an asset.

Treasury Management Reporting

9 The Authority is currently required to receive and approve, as a minimum, three main treasury reports each year, which incorporate a variety of policies, estimates and actuals.

a) **Prudential and treasury indicators and treasury strategy** (this report) - The first, and most important report is forward looking and covers: -

- the capital plans, (including prudential indicators)
- a minimum revenue provision (MRP) policy, (how residual capital expenditure is charged to revenue over time)
- the Treasury Management Strategy, (how the investments and borrowings are to be organised), including treasury indicators; and
- an Annual Investment Strategy, (the parameters on how investments are to be managed)

b) **A mid-year treasury management report** – This is primarily a progress report and will update members on the capital position, amending prudential indicators as necessary, and whether any policies require revision. In addition, this Authority will receive quarterly update reports.

c) **An annual treasury report** – This is a backward-looking review document and provides details of a selection of actual prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy.

Scrutiny

10 The above reports are required to be adequately scrutinised before being recommended to Full Council. This role is undertaken by the Audit and Governance Committee.

11 **Quarterly reports** – In addition to the three major reports detailed above, from 2023/24 quarterly reporting (end of June/end of December) is also required. However, these additional reports do not have to be reported to Full Council but do require to be adequately scrutinised. This role is undertaken by the Audit and Governance Committee. (The reports, specifically, should comprise updated Treasury/Prudential Indicators.)

Treasury Management Strategy for 2023/24

12 The strategy for 2023/24 covers two main areas:

Capital issues

- the capital plans and the prudential indicators;
- the minimum revenue provision (MRP) policy.

Treasury management issues

- the current treasury position;
- treasury indicators which limit the treasury risk and activities of the Council;
- prospects for interest rates;
- the borrowing strategy;
- policy on borrowing in advance of need;
- debt rescheduling;
- the investment strategy;
- creditworthiness policy; and
- policy on use of external service providers.

13 These elements cover the requirements of the Local Government Act 2003, DLUHC Investment Guidance, DLUHC MRP Guidance, the CIPFA Prudential Code and the CIPFA Treasury Management Code.

Training

14 The CIPFA Treasury Management Code requires the responsible officer to ensure that members with responsibility for treasury management receive adequate training in treasury management. This especially applies to members responsible for scrutiny.

15 Furthermore, pages 47 and 48 of the Code state that they expect "all organisations to have a formal and comprehensive knowledge and skills or training policy for the effective acquisition and retention of treasury management knowledge and skills for those responsible for management, delivery, governance and decision making.

16 The scale and nature of this will depend on the size and complexity of the organisation's treasury management needs. Organisations should consider how to assess whether treasury management staff and board/ council members have the required knowledge and skills to undertake their roles and whether they have been able to maintain those skills and keep them up to date.

17 As a minimum, authorities should carry out the following to monitor and review knowledge and skills:

- Record attendance at training and ensure action is taken where poor attendance is identified.
- Prepare tailored learning plans for treasury management officers and council members.
- Require treasury management officers and council members to undertake self-assessment against the required competencies (as set out in the schedule that may be adopted by the organisation).
- Have regular communication with officers and council members, encouraging

them to highlight training needs on an ongoing basis.

18 In further support of the revised training requirements, CIPFA's Better Governance Forum and Treasury Management Network have produced a 'self-assessment by members responsible for the scrutiny of treasury management', which is available from the CIPFA website to download.

19 The following training has been undertaken by members on the 16th June 2022 and further training will be arranged as required.

20 The training needs of treasury management officers are periodically reviewed.

21 A formal record of the training received by officers central to the Treasury function will be maintained by the Finance Manager - Techincal. Similarly, a formal record of the treasury management/capital finance training received by members will also be maintained by the Finance Manager - Techincal.

Treasury management consultants

22 The Councils Treasury Management advisors are Link Asset Services.

23 The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon our external service providers. It also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources.

24 It also recognises that there is value in employing external providers of treasury management services to acquire access to specialist skills and resources. The Authority will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented and subjected to regular review.

The Capital Prudential Indicators 2023/24 – 2025/26

25 The Authority's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in the prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans.

Capital expenditure and Financing

26 This prudential indicator is a summary of the Council's capital expenditure plans, both those agreed previously, and those forming part of this budget cycle. Members are asked to approve the capital expenditure forecasts:

Capital expenditure	2021/22 Actual £'000	2022/23 Estimate £'000	2023/24 Estimate £'000	2024/25 Estimate £'000	2025/26 Estimate £'000
General Fund	78,539	137,699	172,474	56,491	31,236
HRA	38,508	37,072	68,997	43,574	18,520
Total	**117,047**	**174,771**	**241,471**	**100,065**	**49,756**

27 The following tables summarise the above capital expenditure plans and how these plans are being financed by capital or revenue resources. Any shortfall of resources results in a funding borrowing need.

General Fund Capital Expenditure

Capital expenditure	2021/22 Actual £'000	2022/23 Estimate £'000	2023/24 Estimate £'000	2024/25 Estimate £'000	2025/26 Estimate £'000
General Fund Total	**78,539**	**137,699**	**172,474**	**56,491**	**31,236**
Financed by:					
Capital receipts	-	-	-	-	-
Capital grants & Contributions	46,072	84,967	49,488	19,569	16,881
Revenue Finance	903	2,406	2,025	1,318	518
Prudential Borrowing (inc HRA Transfers)	31,564	50,326	120,961	35,604	13,837
Total financing for the year	**78,539**	**137,699**	**172,474**	**56,491**	**31,236**

HRA Capital Expenditure

Capital expenditure	2021/22 Actual £'000	2022/23 Estimate £'000	2023/24 Estimate £'000	2024/25 Estimate £'000	2025/26 Estimate £'000
HRA Total	**38,508**	**37,072**	**68,997**	**43,574**	**18,520**
Financed by:					
Capital receipts	3,484	-	2,445	4,000	478
Capital grants & Contributions	3,886	6,203	20,524	3,867	905
Revenue Finance	12,746	-	-	-	-
Major Repairs Allowance	18,392	18,808	14,386	14,955	14,550
External Borrowing	-	12,061	31,642	20,752	2,587
Total financing for the year	**38,508**	**37,072**	**68,997**	**43,574**	**18,520**

The Council's borrowing need (the Capital Financing Requirement)

28 The second prudential indicator is the Council's Capital Financing Requirement (CFR). The CFR is simply the total historic outstanding capital expenditure which has not yet been paid for from either revenue or capital resources. It is essentially a measure of the Council's underlying borrowing need. Any capital expenditure above, which has not immediately been paid for through a revenue or capital resource, will increase the CFR.

29 The CFR does not increase indefinitely, as the minimum revenue provision (MRP) is a statutory annual revenue charge which broadly reduces the indebtedness in line with each asset's life, and so charges the economic consumption of capital assets as they are used.

30 The CFR includes any other long-term liabilities (e.g. PFI schemes, finance leases). Whilst these increase the CFR, and therefore the Council's borrowing requirement, these types of scheme include a borrowing facility and so the Council is not required to separately borrow for these schemes.

31 The Council is asked to approve the CFR projections overleaf:

	2021/22 Actual £'000	2022/23 Estimate £'000	2023/24 Estimate £'000	2024/25 Estimate £'000	2025/26 Estimate £'000
Capital Financing Requirement					
CFR – General Fund	319,452	353,368	455,391	471,643	466,128
CFR – HRA	137,208	149,269	180,910	201,662	204,249
Total CFR	**456,660**	**502,637**	**636,301**	**673,305**	**670,377**
Movement in CFR	19,969	45,977	133,664	37,004	(2,928)
Movement in CFR represented by					
Net movement in borrowing for the year (above)	31,564	62,387	152,603	56,356	16,424
Less MRP/VRP and other financing movements	(11,595)	(16,410)	(18,938)	(19,352)	(19,352)
Movement in CFR	**19,969**	**45,977**	**133,664**	**37,004**	**(2,928)**

32 A key aspect of the regulatory and professional guidance is that elected members are aware of the size and scope of any borrowing in relation to the authority's overall financial position. The capital expenditure figures and the details above demonstrate the scope of this activity and, by approving these figures, consider the scale proportionate to the Council's remaining activity.

Liability Benchmark

33 A third and new prudential indicator for 2023/24 is the Liability Benchmark (LB). The Authority is required to estimate and measure the LB for the forthcoming financial year and the following two financial years, as a minimum.

34 There are four components to the LB: -

a) **Existing loan debt outstanding**: the Authority's existing loans that are still outstanding in future years.

b) **Loans CFR**: this is calculated in accordance with the loans CFR definition in the Prudential Code and projected into the future based on approved prudential borrowing and planned MRP.

c) **Net loans requirement**: this will show the Authority's gross loan debt less treasury management investments at the last financial year-end, projected into the future and based on its approved prudential borrowing, planned MRP and any other major cash flows forecast.

d) **Liability benchmark** (or gross loans requirement): this equals net loans requirement plus short-term liquidity allowance.

35 Appendix 4 to this strategy illustrates the graphical estimate of the liability benchmark for the general fund and HRA separately. It confirms both funds have net loan requirement supported by the internal borrowing capacity of the authority. This benchmark will continually be updated and referred to as new borrowing is considered in the medium term.

Core Funds and Expected Investment Balances

36 The application of resources (capital receipts, reserves etc.) to either finance capital expenditure or other budget decisions to support the revenue budget will have an ongoing impact on investments unless resources are supplemented each year from new sources (asset sales etc.). Detailed below are estimates of the year-end balances for each resource and anticipated day-to-day cash flow balances.

	2021/22 Actual £'000	2022/23 Estimate £'000	2023/24 Estimate £'000	2024/25 Estimate £'000	2025/26 Estimate £'000
Fund balances / reserves	148,263	145,263	145,763	143,263	151,263
Capital receipts	14,640	14,640	14,640	14,640	14,640
Provisions	30,020	30,020	30,020	30,020	30,020
Other	1,592	1,592	1,592	1,592	1,592
Total core funds	**194,515**	**191,515**	**192,015**	**189,515**	**197,515**
Working Capital*	(170,778)	(165,778)	(171,778)	(175,778)	(170,978)
Under/over borrowing	211,698	210,698	206,698	211,698	211,698
Expected Internal Investments	**40,920**	**44,920**	**34,920**	**35,920**	**40,720**

**Working capital balances shown are estimated year-end; these may be higher mid-year*

Minimum Revenue Provision (MRP) policy statement

37 Under Regulation 27 of the Local Authorities (Capital Finance and Accounting) (England) Regulations 2003, where the Authority has financed capital expenditure by borrowing it is required to make a provision each year through a revenue charge (MRP).

38 The Authority is required to calculate a prudent provision of MRP which ensures that the outstanding debt liability is repaid over a period that is reasonably commensurate with that over which the capital expenditure provides benefits. The MRP Guidance (2018) gives four ready-made options for calculating MRP, but the Authority can use any other reasonable basis that it can justify as prudent.

39 The MRP policy statement requires full council approval in advance of each financial year. The Authority is recommended to approve the following MRP Statement:

40 For capital expenditure incurred before 1 April 2008 or which in the future will be Supported Capital Expenditure, the MRP policy will be:

- 4% reducing balance (CFR method) – MRP will be calculated as 4% of the opening GF CFR balance

From 1 April 2008 for all unsupported borrowing the MRP policy will be either:

- **Asset life method (straight line)** – MRP will be based on the estimated life of the assets;
- **Asset life method (annuity**) – MRP will be based on the estimated life of the assets;

41 It was agreed by members of previous Councils that the following MRP policy was applied from 2016/17 onwards:

- In respect of all supported borrowing, capital expenditure incurred prior to 2016/17 (excluding assets acquired under PFI or finance lease arrangements) MRP will be provided at a rate of 2% on a straight-line basis to ensure the balance is fully cleared over the period in line with the useful life of the assets.

- In respect of all unsupported borrowing, capital expenditure incurred prior to 2016/17 (excluding assets acquired under PFI or finance lease arrangements) the Council will apply the Asset life method as used in previous years and will apply an average life of 25 years for the unsupported borrowing requirement to be repaid over based on historical schemes that have required and applied unsupported borrowing.
- MRP charges from 1 April 2004 to 31 March 2016 exceeded what prudence required during the period under this revised policy. There will be a realignment of MRP charged to the revenue account in 2016/17 and subsequent years to recognise this excess sum. Total MRP after applying realignment will not be less than zero in any financial year.
- In respect of capital expenditure incurred in 2016/17 and subsequent financial years MRP will be provided at a rate of 4% on the written down balance.

42 In 2017/18 a proposed change was made that the 4% write down method will be used for all assets except for significant individual schemes exceeding £10m (such as asset investments) for which the specific asset life will be used for MRP purposes.

43 Assets under construction which have yet to fully deliver their expected benefits will not be subject to MRP charges to the Revenue Account until such time as they become operational for a full accounting year. Accordingly, on becoming operational, the charge for MRP will not commence until the following financial year. The Authority will apply the asset life method for any expenditure capitalised under a Capitalisation Direction.

44 There is no requirement on the HRA to make a minimum revenue provision but there is a requirement for a charge for depreciation to be made. Repayments included in annual PFI or finance leases are applied as MRP.

45 MRP Overpayments - Under the MRP guidance, any charges made in excess of the statutory MRP can be made, known as voluntary revenue provision (VRP). VRP can be reclaimed in later years if deemed necessary or prudent. In order for these amounts to be reclaimed for use in the budget, this policy must disclose the cumulative overpayment made each year. Cumulative VRP overpayments made to date are £0m.

Borrowing

46 The capital expenditure plans set out earlier provide details of the service activity of the Authority. The treasury management function ensures that the Authority's cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to meet this service activity and the Authority's Capital Strategy. This will involve both the organisation of the cash flow and, where capital plans require, the organisation of appropriate borrowing facilities. The strategy covers the relevant treasury / prudential indicators, the current and projected debt positions, and the Annual Investment Strategy.

Current portfolio position

47 The overall Treasury Management portfolio as at 31 March 2022 and for the

position as at 31 December 2022 are shown below for both borrowing and investments.

Treasury investments	Actual 31/03/2022 £'000	Actual 31/03/2022 %	Current 31/12/2022 £'000	Current 31/12/2022 %
Money Market Funds	0	0%	0	0%
Bank Deposits	87,150	58%	54,250	74%
Local Authorities	10,000	7%	10,000	14%
DMO	0	0%	0	0%
Call Account	52,800	35%	8,575	12%
Total Treasury Investments	**149,950**	**100%**	**72,825**	**100%**
Treasury External Borrowing				
PWLB	191,521	75%	189,313	75%
Local Authorities	0	0%	0	0%
Private Sector	65,036	25%	63,941	25%
Salix	255	0%	64	0%
Total External Borrowing	**256,812**	**100%**	**253,318**	**100%**
Net treasury investment / (borrowing)	**(106,862)**		**(180,493)**	

48 The Authority's forward projections for borrowing are summarised below. The table shows the actual external debt, against the underlying capital borrowing need (the Capital Financing Requirement - CFR), highlighting any over or under borrowing.

	2021/22 Actual £'000	2022/23 Estimate £'000	2023/24 Estimate £'000	2024/25 Estimate £'000	2025/26 Estimate £'000
External Debt					
Treasury Debt at 1 April	**256,812**	**256,812**	**256,812**	**266,812**	**316,812**
PFI and Finance Lease Liability	**6,711**	**6,211**	**5,711**	**5,211**	**4,711**
Expected change in Debt	0	0	10,000	50,000	50,000
Actual gross debt at 31 March	**263,523**	**263,023**	**272,523**	**322,023**	**371,523**
The Capital Financing Requirement	**456,660**	**502,637**	**636,301**	**673,305**	**670,377**
Under / (over) borrowing	**193,137**	**239,614**	**363,778**	**351,282**	**298,854**

49 Within the range of prudential indicators there are several key indicators to ensure that the Authority operates its activities within well-defined limits. One of these is that the Authority needs to ensure that its gross debt does not, except in the short-term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for 2023/24 and the following two financial years. This allows some flexibility for limited early borrowing for future years but ensures that borrowing is not undertaken for revenue or speculative purposes.

50 The S151 officer reports that the Authority complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes account of current commitments, existing plans and the proposals in this budget report.

Treasury Indicators: limits to borrowing activity

51 **The operational boundary.** This is the limit beyond which external debt is not normally expected to exceed. In most cases, this would be a similar figure to the CFR, but may be lower or higher depending on the levels of actual debt.

52 **The authorised limit for external debt.** A further key prudential indicator represents a control on the maximum level of borrowing. This represents a limit

beyond which external debt is prohibited, and this limit needs to be set or revised by the full Council. It reflects the level of external debt which, while not desired, could be afforded in the short term, but is not sustainable in the longer term.

a This is the statutory limit determined under section 3 (1) of the Local Government Act 2003. The Government retains an option to control either the total of all Councils' plans, or those of a specific Council, although this power has not yet been exercised.

b The Audit and Governance Committee is asked to approve the following authorised limit:

	2021/22 Actual £m	2022/23 Estimate £m	2023/24 Estimate £m	2024/25 Estimate £m	2025/26 Estimate £m
Operational boundary	797	855	1,334	1,334	1,334
Authorised limit	847	905	1,384	1,384	1,384

Prospects for interest rates

53 The Council has appointed Link Group as its treasury advisor and part of their service is to assist the Council to formulate a view on interest rates. Link provided the following forecasts on 08.11.22. These are forecasts for certainty rates, gilt yields plus 80 bps.

Link Group Interest Rate View	08.11.22												
	Dec-22	Mar-23	Jun-23	Sep-23	Dec-23	Mar-24	Jun-24	Sep-24	Dec-24	Mar-25	Jun-25	Sep-25	Dec-25
BANK RATE	3.50	4.25	4.50	4.50	4.50	4.00	3.75	3.50	3.25	3.00	2.75	2.50	2.50
3 month ave earnings	3.60	4.30	4.50	4.50	4.50	4.00	3.80	3.30	3.00	3.00	2.80	2.50	2.50
6 month ave earnings	4.20	4.50	4.60	4.50	4.20	4.10	3.90	3.40	3.10	3.00	2.90	2.60	2.60
12 month ave earnings	4.70	4.70	4.70	4.50	4.30	4.20	4.00	3.50	3.20	3.10	3.00	2.70	2.70
5 yr PWLB	4.30	4.30	4.20	4.10	4.00	3.90	3.80	3.60	3.50	3.40	3.30	3.20	3.10
10 yr PWLB	4.50	4.50	4.40	4.30	4.20	4.00	3.90	3.70	3.60	3.50	3.40	3.30	3.20
25 yr PWLB	4.70	4.70	4.60	4.50	4.40	4.30	4.10	4.00	3.90	3.70	3.60	3.50	3.50
50 yr PWLB	4.30	4.40	4.30	4.20	4.10	4.00	3.80	3.70	3.60	3.40	3.30	3.20	3.20

Additional notes by Link on this forecast table: -

54 Our central forecast reflects a view that the MPC will be keen to demonstrate its anti-inflation credentials by delivering a succession of rate increases. This has happened throughout 2022, but the new Government's policy of emphasising fiscal rectitude will probably mean Bank Rate does not now need to increase to further than 4.5%.

55 Further down the road, we anticipate the Bank of England will be keen to loosen monetary policy when the worst of the inflationary pressures have lessened – but that timing will be one of fine judgment: cut too soon, and inflationary pressures may well build up further; cut too late and any downturn or recession may be prolonged.

56 The CPI measure of inflation will peak at close to 11% in Q4 2022. Despite the cost-of-living squeeze that is still taking shape, the Bank will want to see evidence that wages are not spiralling upwards in what is evidently a very tight labour market. Wage increases, excluding bonuses, are currently running at 5.7%.

57 Regarding the plan to sell £10bn of gilts back into the market each quarter (Quantitative Tightening), this has started but will focus on the short to medium end of the curve for the present. This approach will prevent any further disruption to the longer end of the curve following on from the short-lived effects of the

Truss/Kwarteng unfunded dash for growth policy.

58 In the upcoming months, our forecasts will be guided not only by economic data releases and clarifications from the MPC over its monetary policies and the Government over its fiscal policies, but the on-going conflict between Russia and Ukraine. (More recently, the heightened tensions between China/Taiwan/US also have the potential to have a wider and negative economic impact.)

59 On the positive side, consumers are still estimated to be sitting on over £160bn of excess savings left over from the pandemic so that will cushion some of the impact of the above challenges. However, most of those are held by more affluent people whereas lower income families already spend nearly all their income on essentials such as food, energy and rent/mortgage payments.

PWLB RATES

60 Yield curve movements have become less volatile under the Sunak/Hunt government. PWLB 5 to 50 years Certainty Rates are, generally, in the range of 3.75% to 4.50%. The medium to longer part of the yield curve is currently inverted (yields are lower at the longer end of the yield curve compared to the short to medium end).

61 We view the markets as having built in, already, nearly all the effects on gilt yields of the likely increases in Bank Rate and the poor inflation outlook but markets are volatile and further whipsawing of gilt yields across the whole spectrum of the curve is possible.

62 Borrowing advice: Our long-term (beyond 10 years) forecast for Bank Rate stands at 2.5%. As all PWLB certainty rates are now above this level, borrowing strategies will need to be reviewed in that context. Better value can generally be obtained at the shorter end of the curve and short-dated fixed LA to LA monies should be considered. Temporary borrowing rates are likely, however, to remain near Bank Rate and may also prove attractive whilst the market waits for inflation, and therein gilt yields, to drop back later in 2023.

63 Our suggested budgeted earnings rates for investments up to about three months' duration in each financial year are as follows: -

Average earnings in each year	
2022/23 (remainder)	3.95%
2023/24	4.40%
2024/25	3.30%
2025/26	2.60%
2026/27	2.50%
Years 6 to 10	2.80%
Years 10+	2.80%

64 As there are so many variables at this time, caution must be exercised in respect of all interest rate forecasts.

65 Our interest rate forecast for Bank Rate is in steps of 25 bps, whereas PWLB forecasts have been rounded to the nearest 10 bps and are central forecasts within bands of + / - 25 bps. Naturally, we continue to monitor events and will update our forecasts as and when appropriate.

Borrowing strategy

66 The Council is currently maintaining an under-borrowed position. This means that the capital borrowing need (the Capital Financing Requirement), has not been fully funded with loan debt as cash supporting the Council's reserves, balances and cash flow have been used as a temporary measure. This strategy is prudent as medium and longer dated borrowing rates are expected to fall from their current levels once prevailing inflation concerns are addressed by tighter near-term monetary policy. That is, Bank Rate increases over the remainder of 2022 and the first half of 2023.

67 The Chief Financial Officer has the delegated responsibility to arrange such loans as are legally permitted to meet the Council's borrowing requirement and to arrange terms of all loans to the Council including amounts, periods and rates of interest.

68 Against this background and the risks within the economic forecast, caution will be adopted with the 2023/24 treasury operations. The Director of Finance will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances:

- if it was felt that there was a significant risk of a sharp FALL in borrowing rates, then borrowing will be postponed.
- if it was felt that there was a significant risk of a much sharper RISE in borrowing rates than that currently forecast, fixed rate funding will be drawn whilst interest rates are lower than they are projected to be in the next few years.

69 Any decisions will be reported to the appropriate decision making body at the next available opportunity.

Policy on borrowing in advance of need

70 The Council will not borrow more than or in advance of its needs purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimates, and will be considered carefully to ensure that value for money can be demonstrated and that the Council can ensure the security of such funds.

71 Risks associated with any borrowing in advance of activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

Debt rescheduling

72 Rescheduling of current borrowing in our debt portfolio is unlikely to occur as there is still a very large difference between premature redemption rates and new borrowing rates, even though the general margin of PWLB rates over gilt yields was reduced by 100 bps in November 2020.

73 If rescheduling was done, it will be reported to the Audit and Governance Committee, at the earliest meeting following its action.

Annual Investment Strategy

Investment Policy

74 The Department of Levelling Up, Housing and Communities (DLUHC) and CIPFA have extended the meaning of 'investments' to include both financial and non-financial investments. This report deals solely with financial investments, (as managed by the treasury management team). Non-financial investments, essentially the purchase of income yielding assets, are covered in the Capital Strategy, (a separate report).

75 The Council's investment policy has regard to the following: -

- DLUHC's Guidance on Local Government Investments ("the Guidance")
- CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes 2021 ("the Code")
- CIPFA Treasury Management Guidance Notes 2021

The Council's investment priorities will be security first, portfolio liquidity second and then yield, (return).

76 In the current economic climate, it is considered appropriate to maintain a degree of liquidity to cover cash flow needs but to also consider "laddering" investments for periods up to 12 months with high credit rated financial institutions, whilst

investment rates remain elevated, as well as wider range fund options.

77 The above guidance from the DLUHC and CIPFA places a high priority on the management of risk. This Authority has adopted a prudent approach to managing risk and defines its risk appetite by the following means: -

a) Minimum acceptable credit criteria are applied in order to generate a list of highly creditworthy counterparties. This also enables diversification and thus avoidance of concentration risk. The key ratings used to monitor counterparties are the short-term and long-term ratings.

b) Other information: ratings will not be the sole determinant of the quality of an institution; it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To achieve this consideration the Authority will engage with its advisors to maintain a monitor on market pricing such as “credit default swaps” and overlay that information on top of the credit ratings.

c) Other information sources used will include the financial press, share price and other such information pertaining to the financial sector in order to establish the most robust scrutiny process on the suitability of potential investment counterparties.

d) This Authority has engaged external consultants, to provide expert advice on how to optimise an appropriate balance of security, liquidity and yield, given the risk appetite of this Authority in the context of the expected level of cash balances and need for liquidity throughout the year.

e) All investments will be denominated in sterling.

f) As a result of the change in accounting standards for 2022/23 under IFRS 9, this Authority will consider the implications of investment instruments which could result in an adverse movement in the value of the amount invested and resultant charges at the end of the year to the General Fund. (In November 2018, the MHCLG, concluded a consultation for a temporary override to allow English local authorities time to adjust their portfolio of all pooled investments by announcing a statutory override to delay implementation of IFRS 9 until 31.3.25

78 However, this Authority will also pursue value for money in treasury management and will monitor the yield from investment income against appropriate benchmarks for investment performance. Regular monitoring of investment performance will be carried out during the year.

Creditworthiness policy

79 The primary principle governing the Council’s investment criteria is the security of its investments, although the yield or return on the investment is also a key consideration. After this main principle, the Council will ensure that:

a It maintains a policy covering both the categories of investment types it will invest in, criteria for choosing investment counterparties with adequate security, and monitoring their security. This is set out in the specified and non-specified investment sections below; and b It has sufficient liquidity in its investments. For this purpose, it will set out procedures for determining the maximum periods for which funds may prudently be committed. These procedures also apply to the Council’s prudential indicators covering the maximum principal sums invested.

80 The Chief Financial Officer will maintain a counterparty list in compliance with the following criteria and will revise the criteria and submit them to Council for approval as necessary. These criteria are separate to which types of investment instruments that can be used as it provides an overall pool of counterparties considered high quality which the Council may use, rather than defining what types of investment instruments are to be used.

81 Credit rating information is supplied by Link Asset Services, our treasury consultants, on all active counterparties that comply with the criteria below. Any counterparty failing to meet the criteria would be omitted from the counterparty (dealing) list. Any rating changes, rating watches (notification of a likely change), rating outlooks (notification of a possible longer-term change) are provided to officers almost immediately after they occur, and this information is considered before dealing. For instance, a negative rating watch applying to a counterparty at the minimum Council criteria will be suspended from use, with all others being reviewed in light of market conditions.

82 The criteria for providing a pool of high-quality investment counterparties (both specified and non-specified investments) is:

Sovereign Ratings

- AAA (non-UK)

(Rating Description: AAA = Prime Rating, AA+, AA, AA- = High Grade Rating)

Appendix 2 sets out the current list of countries that the Council can invest funds with.

The UK sovereign rating is currently AA. To ensure that the Treasury Function has capacity to operate effectively no specific minimum UK sovereign rating has been set out.

Selection Criteria

83 Banks 1 - the Council will use UK and non-UK banks which have, as a minimum at least one of, the following Fitch, Moody’s and Standard & Poors credit ratings (where rated):

	Fitch	**Moody’s**	**Standard & Poors**
Short Term	F1	P1	A-1
Long Term	A-	A3	A-

84 Investments will include term deposits, call accounts, notice accounts and Certificate of Deposits.

a Banks 2 – Part nationalised UK bank – Royal Bank of Scotland ring-fenced operations. This bank can be included provided it continues to be part nationalised or it meets the ratings in Banks 1 above.

b Banks 3 – The Council’s own bankers (HSBC, Lloyds and Barclays) for transactional purposes if the bank falls below the above criteria, although in this case balances will be minimised in both monetary size and time.

c Bank subsidiary and treasury operation - The Council will use these where the parent bank has provided an appropriate guarantee or has the necessary ratings outlined above.

d Building societies. The Council will use societies which meet the ratings for Banks 1 outlined above.

e Money Market Funds (MMFs) Constant net asset value (CNAV)

f Money Market Funds (MMFs) Low-Volatility net asset value (LVNAV)

g Money Market Funds (MMFs) Variable net asset value (VNAV)

h Ultra-Short Dated Bond Funds with a credit rating of at least 1.25

i Ultra-Short Dated Bond Funds with a credit rating of at least 1.50

j Cash Plus Funds

k UK Government (including gilts, Treasury Bills and the Debt Management Account Deposit Facility (DMADF))

l Royal Bournemouth and Christchurch Hospital NHS Foundation trusts

m Local authorities, Police and Fire Authorities, Parish Councils, BCP Council Companies (Subsidiaries) and Partnerships.

n Pooled Funds

Maximum Time and Monetary Limits applying to Investments

85 The maximum amount that can be invested in any one institution at the time of the investment (including call accounts) as a percentage of the total investment portfolio has been reviewed and rationalised. All AA- and above rated institutions have a maximum limit of 25%, all A+, A or A- rated institutions have a maximum limit of 20%. For practical reasons where the average investment balance falls below £10m it may become necessary to increase the percentage limit to 33% at the time of investment (this only applies to call accounts and money market funds).

86 The maximum time and monetary limits for institutions on the Council’s Counterparty List are as follows (these will cover both Specified and Non-Specified Investments):

	Long Term Rating	Money Limit	Time Limit
Banks 1 higher quality	AA-	25%	2 years
Banks 1 medium quality	A	20%	1 year
Banks 1 lower quality	A-	20%	6 months
Banks 2 category – part-nationalised			

RBS / Nat West	N/A	20%	2 years
Banks 3 category – Council's banker HSBC	AA-	25%	3 months
UK Government (including gilts, Treasury Bills and the DMADF)	AAA	25%	6 months
Local Authorities	N/A	20%	5 years
Money Market Funds CNAV	AAA	25%	Instant access
Money Market Funds LVNAV	AAA	25%	Instant access
Money Market Funds VNAV	AAA	25%	Instant access
Ultra-Short Dated Bond Funds	N/A	25%	Unlimited
Cash Plus Funds	AAA	25%	Unlimited
UK Gilts	UK Sovereign Rate	25%	5 years

Use of additional information other than credit ratings

87 Additional requirements under the Code require the Council to supplement credit rating information. Whilst the above criteria relies primarily on the application of credit ratings to provide a pool of appropriate counterparties for officers to use, additional operational market information will be applied before making any specific investment decision from the agreed pool of counterparties. This additional market information will be applied to compare the relative security of differing investment counterparties.

Investment strategy

In-house funds

88 Investments will be made with reference to the core balance and cash flow requirements and the outlook for short-term interest rates (i.e. rates for investments up to 12 months).

Investment returns expectations

89 Bank Rate is is forecast to increase from the current 3.5% in Q2 2023.

90 The suggested budgeted investment earnings rates for returns on investments placed for periods up to about three months during each financial year are as follows (the long term forecast is for periods over 10 years in the future):

Average earnings in each year	
2022/23 (remainder)	3.95%
2023/24	4.40%
2024/25	3.30%
2025/26	2.60%
2026/27	2.50%
Years 6 to 10	2.80%
Years 10+	2.80%

Investment treasury limit

91 The maximum period for investments will be 5 years.

Ethical Investing

92 This is an area of investing that is becoming increasingly considered by financial institutions and customers. Products from financial institutions are growing but still remain limited. To consider investing in sustainable deposits they will still need to meet our counterparty criteria and parameters set out earlier in the strategy. Investment guidance, both statutory and from CIPFA, makes clear that all investing must adopt SLY principles – security, liquidity and yield: ethical issues must play a subordinate role to those priorities. The Treasury team will continue to explore this area and report to members of any further developments.

Treasury Management Policy, Practices and Schedules

93 The Treasury Management Policy, Practices and Schedules will be presented alongside this 2023/24 update of the TM Strategy.

Appendices

Appendix 1 - Economic Background and interest rate forecasts

Appendix 2 - Approved Countries for investments

Appendix 3 – The Treasury Management role of the S151 Officer

Appendix 1: Economic Background (provided by Link Asset Services)

Against a backdrop of stubborn inflationary pressures, the easing of Covid restrictions in most developed economies, the Russian invasion of Ukraine, and a range of different UK Government policies, it is no surprise that UK interest rates have been volatile right across the curve, from Bank Rate through to 50-year gilt yields, for all of 2022.

Market commentators' misplaced optimism around inflation has been the root cause of the rout in the bond markets with, for example, UK, EZ and US 10-year yields all rising by over 200bps since the turn of the year. The table below provides a snapshot of the conundrum facing central banks: inflation is elevated but labour markets are extra-ordinarily tight, making it an issue of fine judgment as to how far monetary policy needs to tighten.

	UK	Eurozone	US
Bank Rate	3.0%	1.5%	3.75%-4.00%
GDP	-0.2%q/q Q3 (2.4%y/y)	+0.2%q/q Q3 (2.1%y/y)	2.6% Q3 Annualised
Inflation	11.1%y/y (Oct)	10.0%y/y (Nov)	7.7%y/y (Oct)
Unemployment Rate	3.6% (Sep)	6.6% (Sep)	3.7% (Aug)

Q2 of 2022 saw UK GDP revised upwards to +0.2% q/q, but this was quickly reversed in the third quarter, albeit some of the fall in GDP can be placed at the foot of the extra Bank Holiday in the wake of the Queen's passing. Nevertheless, CPI inflation has picked up to what should be a peak reading of 11.1% in October, although with further increases in the gas and electricity price caps pencilled in for April 2023, and the cap potentially rising from an average of £2,500 to £3,000 per household, there is still a possibility that inflation will spike higher again before dropping back slowly through 2023.

The UK unemployment rate fell to a 48-year low of 3.6%, and this despite a net migration increase of c500k. The fact is that with many economic participants registered as long-term sick, the UK labour force actually shrunk by c£500k in the year to June. Without an increase in the labour force participation rate, it is hard to see how the UK economy will be able to grow its way to prosperity, and with average wage increases running at 5.5% - 6% the MPC will be concerned that wage inflation will prove just as sticky as major supply-side shocks to food and energy that have endured since Russia's invasion of Ukraine on 22nd February 2022.

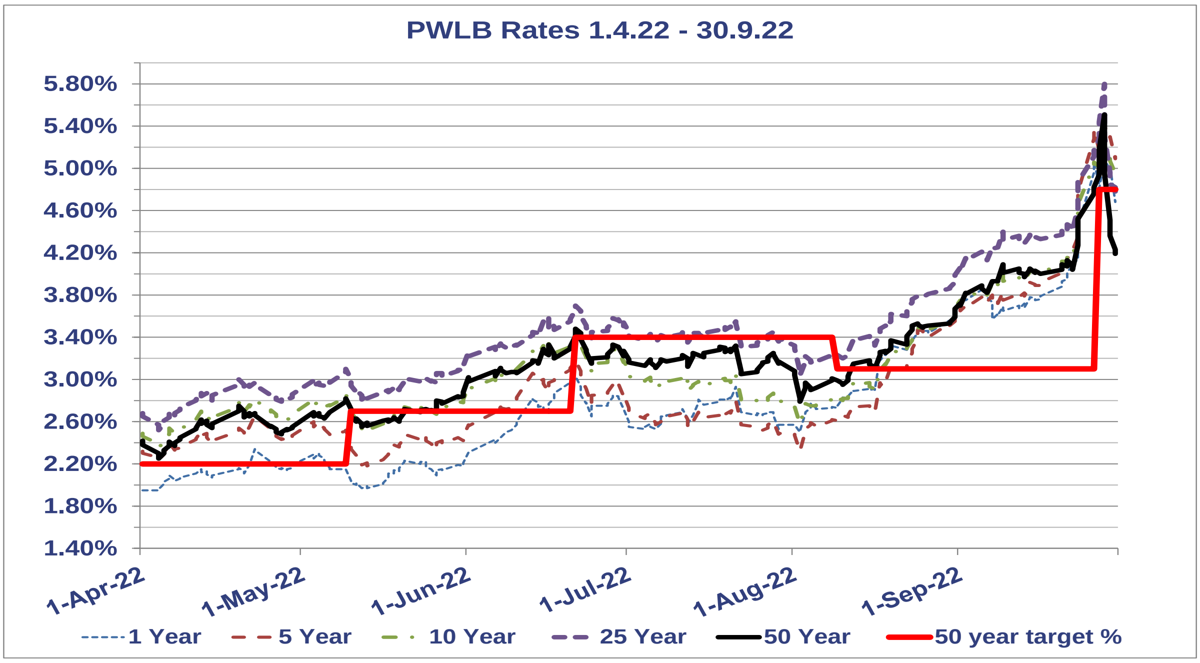
Throughout Q3 Bank Rate increased, finishing the quarter at 2.25% (an increase of 1%). Q4 has seen rates rise to 3% in November and the market expects Bank Rate to hit 4.5% by May 2023.

Following a Conservative Party leadership contest, Liz Truss became Prime Minister for a tumultuous seven weeks that ran through September and December. Put simply, the markets did not like the unfunded tax-cutting and heavy spending policies put forward by her Chancellor, Kwasi Kwarteng, and their reign lasted barely seven weeks before being replaced by Prime Minister Rishi Sunak and Chancellor Jeremy Hunt. Their Autumn Statement of 17th November gave rise to a net £55bn fiscal tightening, although much of the "heavy lifting" has been left for the next Parliament to deliver. However, the markets liked what they heard, and UK gilt yields have completely reversed the increases seen under the previous tenants of No10/11 Downing Street.

Globally, though, all the major economies are expected to struggle in the near term. The fall below 50 in the composite Purchasing Manager Indices for the UK, US, EZ and China all point to at least one if not more quarters of GDP contraction. In November, the MPC projected eight quarters of negative growth for the UK lasting throughout 2023 and 2024, but with Bank Rate set to peak at lower levels than previously priced in by the markets and the fiscal tightening deferred to some extent, it is not clear that things will be as bad as first anticipated by the Bank.

The £ has strengthened of late, recovering from a record low of $1.035, on the Monday following the Truss government's "fiscal event", to $1.20. Notwithstanding the £'s better run of late, 2023 is likely to see a housing correction of some magnitude as fixed-rate mortgages have moved above 5% and affordability has been squeezed despite proposed Stamp Duty cuts remaining in place.

In the table below, the rise in gilt yields, and therein PWLB rates, through the first half of 2022/23 is clear to see.



However, the peak in rates on 28th September as illustrated in the table covering April to September 2022 below, has been followed by the whole curve shifting ever lower. PWLB rates at the front end of the curve are generally over 1% lower now whilst the 50 years is over 1.75% lower.

	1 Year	5 Year	10 Year	25 Year	50 Year
Low	1.95%	2.18%	2.36%	2.52%	2.25%
Date	01/04/2022	13/05/2022	04/04/2022	04/04/2022	04/04/2022
High	5.11%	5.44%	5.35%	5.80%	5.51%
Date	28/09/2022	28/09/2022	28/09/2022	28/09/2022	28/09/2022
Average	2.81%	2.92%	3.13%	3.44%	3.17%
Spread	3.16%	3.26%	2.99%	3.28%	3.26%

After a shaky start to the year, the S&P 500 and FTSE 100 have climbed in recent weeks, albeit the former is still 17% down and the FTSE 2% up. The German DAX is 9% down for the year.

CENTRAL BANK CONCERNS – NOVEMBER 2022

At the start of November, the Fed decided to push up US rates by 0.75% to a range of 3.75% - 4%, whilst the MPC followed a day later by raising Bank Rate from 2.25% to 3%, in line with market expectations. EZ rates have also increased to 1.5% with further tightening in the pipeline.

Having said that, the press conferences in the US and the UK were very different. In the US, Fed Chair, Jerome Powell, stated that rates will be elevated and stay higher for longer than markets had expected. Governor Bailey, here in the UK, said the opposite and explained that the two economies are positioned very differently so you should not, therefore, expect the same policy or messaging.

Regarding UK market expectations, although they now expect Bank Rate to peak within a lower range of 4.5% - 4.75%, caution is advised as the Bank of England Quarterly Monetary Policy Reports have carried a dovish message over the course of the last year, only for the Bank to have to play catch-up as the inflationary data has proven stronger than expected.

In addition, the Bank's central message that GDP will fall for eight quarters starting with Q3 2022 may prove to be a little pessimistic. Will the £160bn excess savings accumulated by households through the Covid lockdowns provide a spending buffer for the economy – at least to a degree? Ultimately, however, it will not only be inflation data but also employment data that will mostly impact the decision-making process, although any softening in the interest rate outlook in the US may also have an effect (just as, conversely, greater tightening may also).

Appendix 2: Approved countries for investments

AA-

- United Kingdom
- Belgium

AA

- France

AA+

- Canada
- Finland

Appendix 3: The Treasury Management role of the section 151 officer

The S151 (responsible) officer

- recommending clauses, treasury management policy/practices for approval, reviewing the same regularly, and monitoring compliance;
- submitting regular treasury management policy reports;
- submitting budgets and budget variations;
- receiving and reviewing management information reports;
- reviewing the performance of the treasury management function;
- ensuring the adequacy of treasury management resources and skills, and the effective division of responsibilities within the treasury management function;
- ensuring the adequacy of internal audit, and liaising with external audit;
- recommending the appointment of external service providers.
- preparation of a Capital Strategy to include capital expenditure, capital financing, non-financial investments and treasury management, with a long-term timeframe *(say 20+ years – to be determined in accordance with local priorities.)*
- ensuring that the Capital Strategy is prudent, sustainable, affordable and prudent in the long term and provides value for money
- ensuring that due diligence has been carried out on all treasury and non-financial investments and is in accordance with the risk appetite of the authority
- ensure that the Authority has appropriate legal powers to undertake expenditure on non-financial assets and their financing
- ensuring the proportionality of all investments so that the Authority does not undertake a level of investing which exposes the Authority to an excessive level of risk compared to its financial resources
- ensuring that an adequate governance process is in place for the approval, monitoring and ongoing risk management of all non-financial investments and long-term liabilities
- provision to members of a schedule of all non-treasury investments including material investments in subsidiaries, joint ventures, loans and financial guarantees
- ensuring that members are adequately informed and understand the risk exposures taken on by the Authority
- ensuring that the Authority has adequate expertise, either in house or externally provided, to carry out the above
- creation of Treasury Management Practices which specifically deal with how non treasury investments will be carried out and managed, to include the following:-
    - *Risk management (TMP1 and schedules), including investment and risk management criteria for any material non-treasury investment portfolios;*
    - *Performance measurement and management (TMP2 and schedules), including methodology and criteria for assessing the performance and success of non-treasury investments;*
    - *Decision making, governance and organisation (TMP5 and schedules), including a statement of the governance requirements for decision making in relation to non-treasury investments; and arrangements to ensure that appropriate professional due diligence is carried out to support decision making;*

- *Reporting and management information (TMP6 and schedules), including where and how often monitoring reports are taken;*

- *Training and qualifications (TMP10 and schedules), including how the relevant knowledge and skills in relation to non-treasury investments will be arranged.*
