<b>ADAM DUNN DESIGN</b> <small>ARCHITECTURAL DESIGN &amp; PLANNING APPROVAL</small>		<b>ARCHITECTURAL DESIGN</b> <b>PLANNING APPROVAL</b> <b>BUILDING CONSULTANCY</b>																																									
		<b>PLANNING NOTES</b>																																									
<b>DRAINAGE (SuDS)</b> A new soakaway will be designed in accordance with Approved Document H & BRE Digest 365, the design allows an increase of 30% for climate change. The proposed hardstanding areas shall be laid with a cross fall so all rainwater shall be directed into the ground locally and within the site boundaries. Provide a silt trap to the surface water drainage line so that the silt and debris can be removed before it can enter the soakaway. The silt trap shall be cleared weekly until the development is completed after which a three monthly inspection rota shall be followed.																																											
<b>WASTE STORAGE</b> A new area will be provided for bin storage.																																											
<b>BOUNDARY TREATMENT</b> The site shall be surrounded in 2.0m high fencing.
