

RESOLVED: That Council refers to the Environment and Place Overview and Scrutiny Committee to investigate the following requests:

1. Ask Cabinet to set out the reasons why BCP Council does not currently provide a live, real-time traffic and road status service comparable to Dorset Council's, including an assessment of costs, funding priorities and whether financial considerations alone justify the absence of such a service.
2. Request that officers urgently explore the development of a publicly accessible, real-time system covering traffic disruption, flooding, road closures and emergency conditions across BCP.
3. Call for a long-term, resilient approach that brings together all relevant agencies, stakeholders and partners including highways, emergency services, water and sewerage providers, planning authorities and neighbouring councils to address information sharing, sewer backflow, drainage capacity and infrastructure resilience during extreme weather.
4. Require that sewer network capacity, flood risk and surface water management are explicitly and robustly addressed within planning policy and development decisions.
5. Request a report back to Full Council setting out options, costs, responsibilities and timescales for delivery.
