---

Dear Licensing team,

Following your notification that the consultation process is restarting I wish to resubmit my representation

I am submitting this representation on behalf of Environmental Health under the licensing objective of the Prevention of Public Nuisance.

To ensure that the proposed activities, including music but also other noise from the running of the establishment, do not result in undue disturbance to nearby residents, particularly those living in the flats above the premises, Environmental Health requests that a noise impact assessment be undertaken. This assessment should be carried out by a suitably qualified professional and must consider the building's construction, including shared walls, floors, and ceilings, to evaluate the potential for noise transmission into neighbouring properties.

Once completed, the assessment should be submitted to Environmental Health for review. Any recommendations arising from the assessment must be fully implemented, and these measures should be incorporated into the operating schedule of the licence application to ensure appropriate controls are in place to mitigate noise impacts.

Kind regards,

Andrew Wemyss
